Our aim is to contribute to the elimination of TB in the European Union by applying evidence-based interventions to ensure early diagnosis, improving integrated care and supporting community and prison outreach activities in low and high-incidence countries.

E-DETECT TB is a practical programme of translational research targeting homeless people, prisoners, high-risk drug users and those with multi-drug resistant tuberculosis in Romania and Bulgaria, migrants arriving on Italian coasts and asylum seekers in Italy, and improved control of tuberculosis in migrants in other European countries.

We work jointly to evaluate the implementation of evidence-based interventions, taking best practice approaches from countries where national strategic plans have been developed. In collaboration with the European Center for Disease Prevention and Control (ECDC), we will provide a common framework for the adaptation of guidelines and policies to strengthen TB control across the European Union.

**Work package 4: Outreach for Early Diagnosis**

- **Background**:TB is an epidemic that disproportionately affects the most vulnerable, including migrants who are likely to be highly infected.
- **Objectives**:
  - Develop a strategy and tools to raise TB awareness among migrants.
  - Develop a strategy and tools to encourage TB screening among migrants.
- **Key achievements**:
  - Model of the programme developed.

**Work package 5: Migrant TB detection, prevention and treatment**

- **Background**:The European Union’s Health Programme supports TB control activities.
- **Objectives**:
  - Develop guidelines and tools for the diagnosis and management of TB among migrants.
  - Develop guidelines and tools for the prevention of TB among migrants.
- **Key achievements**:
  - Model of the programme developed.
  - Guidelines and tools developed.
  - Monitoring and evaluation of the programme.

**Work package 6: Establishing a database on migrant TB screening in Europe**

- **Background**:The European Union’s Health Programme supports TB control activities.
- **Objectives**:
  - Develop guidelines and tools for the diagnosis and management of TB among migrants.
  - Develop guidelines and tools for the prevention of TB among migrants.
- **Key achievements**:
  - Model of the programme developed.
  - Guidelines and tools developed.
  - Monitoring and evaluation of the programme.

**Work package 7: Supporting national TB control programmes**

- **Background**:The European Union’s Health Programme supports TB control activities.
- **Objectives**:
  - Develop guidelines and tools for the diagnosis and management of TB among migrants.
  - Develop guidelines and tools for the prevention of TB among migrants.
- **Key achievements**:
  - Model of the programme developed.
  - Guidelines and tools developed.
  - Monitoring and evaluation of the programme.
